Product short description:

Our classic ceiling canopy with a lot of length. We've taken our single hole canopies and added a 5.9" inch metal Cylindrical strain relief to allow you to make a statement. Use this canopy to make your own pendant lights, wall sconces, or to replace most existing pendant light ceiling canopies.

Just choose the color and style of the single hole ceiling canopy that you want and it will include a matching 5" long metal strain relief clamp.

These single hole ceiling canopies are 4.7 inches in diameter. Large enough to cover a standard junction box. They have a height of 1 inch, which allows plenty of room for wiring if you choose to mount these to a wall or ceiling without using a j-box. The single center hole has a diameter of 3/8 inch.

All of our ceiling canopies are designed to work with our round and twisted pendant light cloth covered wire color cord. So mix and match your favorite color cable with the ceiling canopy of your choice. Or you can make your own wall sconce by matching a canopy with your choice of light bulb socket, extension tube, and/or elbow pipe! So pull out that inner lighting designer and get creative with our lamp parts.

What's in the box? This single hole ceiling canopy comes with: the canopy; a crossbar for attaching the ceiling canopy to the junction box, wall or ceiling; two screws for attaching to a wall; two screws for attaching the mounting plate to the sides of the ceiling canopy; and a 5.9 inch long cylindrical shaped metal strain relief clamp.

Be sure to check out all of lamp parts here at Creative Cables. You'll find an extensive selection of everything from cloth covered wire, unique XL LED light bulbs, light bulb sockets and more.

Product description:
