Product short description:

The ceramic Vase lampshade from our Materia Collection brings a touch of elegance to your home, featuring shapes inspired by the Mediterranean style of Italy.

Each piece is unique and crafted by skilled artisans just outside of Venice, Italy. Every lampshade is hand-painted and kiln-fired to achieve a vibrant, high-quality finish. The interior of each shade is white-polished to enhance and spread light beautifully.

Please note that because each piece is handmade, variations in color, finish, and texture are to be expected—these are not defects. Additionally, the colored versions are designed with a painted overlay that intentionally chips away over time, reflecting the traditional style of southern Italian ceramics. This is an intentional design element and not a flaw.

Pair this shade with a variety of lamp parts, cloth-covered wires, and unique light bulbs. The Vase shade works best with A19, G30, or ST21-style bulbs.

These pendant light shades are compatible with E26 double ferrule or UNO-style light bulb sockets. To install, simply remove the light bulb from your socket, slide on the lampshade, tighten the ferrule (ring) to secure it, and screw the bulb back into place. Please note that these shades will not work with sockets that lack ferrules or rings.

Attention! Bulb and socket **NOT** included.

Product description:

Tall Lampshade - The Materia Collection - technical specs:

Material: hand painted ceramic.

Diameter: 5.12"

Height: 11"

Weight 2.1 lbs

Inner hole diameter: 1.7", works with double ferrule or UNO style sockets
